

SINGLE USE DATA ALOGGER

Model: D25 /D50 /D99

Apresys DL-99 is the most versatile Disposable Logger for cold chain monitoring applications. It is easy to use, and has accurate temperature sensor to record the in-transit temperature. The point-by-point raw data can be extracted directly from the Software, which streamlines data management .

MODEL NO.			
Sr.No.	DL-25	DL-50	DL-99
1	Max Recording 25 days.	Max Recording 50 Days.	Max Recording 50-99 Days.
2	Sample Rate 5 Minute.	Sample rate 10 Minute.	Sample rate 20 Minute.
3	Use for 1-25 days.	use for 25-50 Days	use for 99 Days

This model of temperature recorder is efficient, durable and portable, economical and practical for low cost requirement. As these products are made of superior soft material, they are shock-proof, dust-proof and fog-proof. The model is characterized by its compact size and high accuracy. Even if the power is using up, it still can be used for reading and printing data.

Specifications

Temperature Range: -40°F ~185°F , -40°C ~ 85°C

Accuracy: $\pm 0.8^{\circ}\text{F}$ ($\pm 0.5^{\circ}\text{C}$)

Resolution: 0.01°F/ 0.01°C

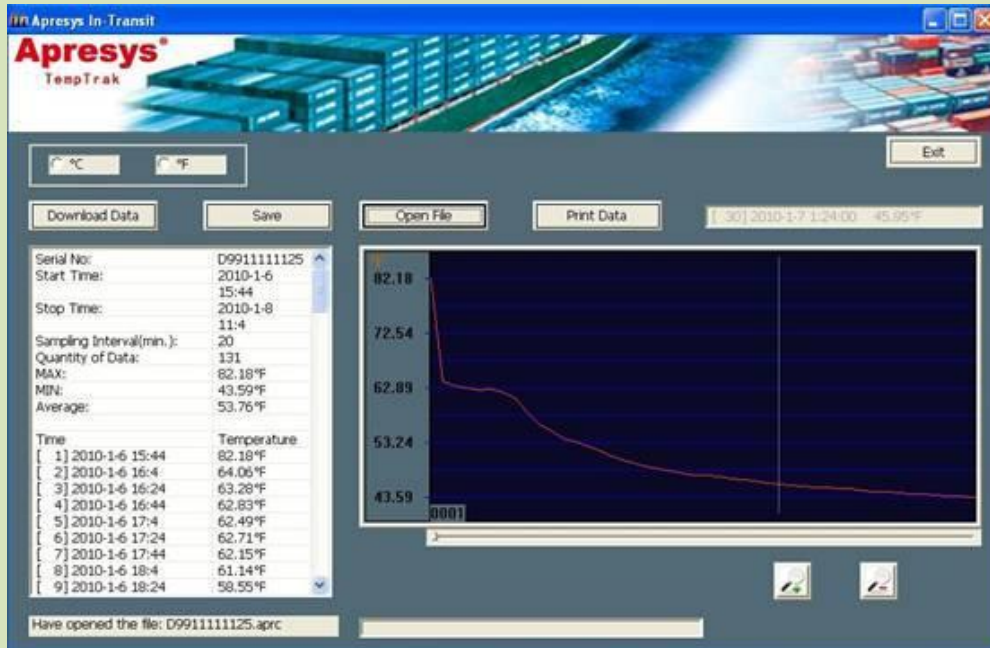

Battery Life: 2 years

Dimension: 3.5" x 1.3" x 0.5"(8.9cm * 3.4 cm *1.2 cm)

Weight: 1.25 oz.(35g)

Operating Instruction

- ❖ Long hold "START " start-up key about 5s. Data logger starts recording data after the red indicator LED light starts flashing three times and keeps lighting ten times.
- ❖ It blinks every 5s during the normal working time
- ❖ Once the transit shipment has reached destination, the temperature recorder can be connected with computer or printer for reading the data. In the same time, the recorder will be stopped working automatically. The indicator light will not blink & the device will never start but the data of the recorder can still be read repeatedly.
- ✓ Keep the plate recorder properly, could reprint when searching history, and could be kept permanently.

Applications :

- Clinical trails
- Fish Meat
- Fruits And Vegetables
